**Subject:** Re: Draft Sulfolane PPRTV document

Hi:

Because of the interest in this chemical, it was pulled from the normal clearance process and is being expedited. I expected that it would have been cleared before Thanksgiving. I'll check to see if it's now final. I'll get back to you as soon as I find out.

Bye for now

Dan

Hi Dan

I'm giving an update to a project team for a site that involves sulfolane. I know the team is going to ask about the status of the PPRTV, so I wanted to check in to see if you had any new info.

Hi:

We sent so many documents to Washington near the end of the fiscal year that they are swamped, and clearance is taking a bit longer than usual. The RfD/RfC numbers in the document have not changed since the draft you've seen. The main change was the moving of the RfD from the appendix to the body of the document, as the principal study was peer-reviewed. The chronic RfC remains in the appendix, as the composite uncertainty factor remains at 10,000.

I hope to have something soon.

Thanks for your interest.

Hi:

It's in final clearance in Washington, we should have it released in a few days. It will appear on the superfund website then. I'll send you a copy if I get it first.

Thanks

Dan

Hi:

Here's the current draft. Again, the disclaimers are the this should not yet be quoted or cited since it is out for external review and is not yet final. Please don't share it outside your office. Should you get inquiries for copies of the draft, have them come directly to me. We expect to publish the final document before the end of the fiscal year September 31.

Dan

On our last sulfolane Toxicity call you mentioned the draft PPRTV document was available for review. Am I able to get a copy of it?
